-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extension of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 11/13/06.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-142 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-142 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

Art Unit: 3629

### DETAILED ACTION

1. This is in response to the applicant's communication filed on November 13, 2006, wherein:

Claims 1-142 are currently pending;

Claims 1, 23, 56, 65, 72, 94, 127 and 136 have been amended.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-17, 19, 22-49, 51, 55-64, 72-88, 90, 93-120, 122, and 126-135 are rejected under 35 U.S.C. 102(e) as being anticipated by Ginter et al (US 2004/0133793) (hereinafter referred to as Ginter).

Referring to Claims 1 and 72:

Ginter discloses a computer implemented method and medium for managing a contract ([0012] under VDE, such an extended agreements may comprise an electronic contracts [0053]), comprising:

receiving, over a network, from a client/user computer that runs a browser ([0989][1892] [2238] user may either make use of a standard application program (e.g. World Wide Web browser); browsing interface [2196]), an inquiry regarding licensing

Art Unit: 3629

of a first set of software under a particular contract [0007-0008] *Electronic content* [0012] *electronic contract*, [0053] *VDE can enable a very broad variety of electronically enforced commercial and societal agreements. These agreements can include electronically implemented contracts, licenses, laws, regulations, and tax collection;* [0078-0081] *Electronic content* [0093], [0161-0162], *Figures 72A-72D*, [0137] *content providers who employ the present invention may include software applications* [0425] *the "events" may include, for example, a request to use content or generate a usage permission;* *a common example of this type of negotiation today is the purchase of software under the terms of a "shrink-wrap license";* [1947] *an electronic contract is an electronic form of an agreement including rights, restrictions, and obligations of the parties to the agreement. In many cases, electronic agreements may surround the use of digitally provided content; for example, a license to view a digitally distributed movie);*

in response to receiving the inquiry, accessing, at a management system coupled to the client/user computer via a network (Figure 1), information pertaining to the contract, the information comprising quota parameters which specifies a quota of resources that can be consumed under the contract (*Figure 2A Rules and controls, Figures 5A and 5B Permissions record* (808) [0161-0162] *parameters* [0166] *metering the number of copies, Figures 3 and 4, [0214],[0426-0433]);*

determining a first licensing (subsets or extended agreements) amount attributable to licensing the first set of software ([0012][0405] *how much it costs to use*

Art Unit: 3629

*the content, [0410-0411] specify how much it costs[0426-0431], Figure 26A (944) number of rights record, Figure 50d (1718));*

*updating the quota parameter based, at least partially, upon the first licensing amount (Figure 61 (2239) update Meter, [0393]) ;*

*sending license terms/parameters/rules over a network to a licensing host that is coupled to said management system via the network (Figure 1) and communicates with the first set of software and enforces the license terms/parameters/rules relative to the first set of software over the network (Figure 1, Figure 77, [0083] [0093] [0162-01634]); and*

*allowing the first set of software to be used under the contract (Figure 3 (402) GO, [0061-0062] distribution of permissions to use electronic information).*

Referring to Claims 23 and 94:

*Ginter discloses a computer implemented method and medium for managing a contract ([0012] under VDE, such an extended agreements may comprise an electronic contracts [0053])), comprising:*

*receiving, over a network from a user/client computer that runs a browser program ([0989][1892] [2238] user may either make use of a standard application program (e.g. World Wide Web browser browsing interface [2196]), at a management system coupled to the client computer via a network (Figure 1) a first inquiry regarding licensing of a first set of software under a particular contract [0007-0008] Electronic content [0012] electronic contract, [0053] VDE can enable a very broad variety of electronically enforced commercial and societal agreements. These agreements can*

Art Unit: 3629

*include electronically implemented contracts, licenses, laws, regulations, and tax collection; [0078-0081] Electronic content [0093], [0161-0162], Figures 72A-72D, [0137] content providers who employ the present invention may include software applications [0425] the "events" may include, for example, a **request to use content or generate a usage permission**; a common example of this type of negotiation today is the purchase of software under the terms of a "shrink-wrap license"; [1947] an electronic contract is an electronic form of an agreement including rights, restrictions, and obligations of the parties to the agreement. In many cases, electronic agreements may surround the use of digitally provided content; for example, a license to view a digitally distributed movie);*

*in response to receiving the inquiry at the management system, accessing information pertaining to the contract, the information comprising quota parameter which specifies a quota of resources that can be consumed under the contract, and one or more contract terms associated with the contract (Figure 2A Rules and controls, Figures 5A and 5B **Permissions record** (808) [0161-0162] parameters [0166] metering the number of copies, Figures 3 and 4, [0214], [0426-0433]);*

*determining a first licensing amount (subsets or extended agreements) attributable to licensing the first set of software, said licensing amount determined, at least partially, by applying one or more of the contract terms ([0012], [0174] VDE control information (including budgeting, pricing, and metering) can be configured so that it can specifically apply, as appropriate, to ad hoc selection of different, unanticipated variable user selected aggregations of information increments and pricing*

Art Unit: 3629

*levels can be, at least in part, based on quantities and/or nature of mixed increment selections [0405] how much it costs to use the content, [0410-0411] specify how much it costs, [0426-0431]; Figure 26A (944) number of rights record; Figure 50d (1718; [2319-2321);*

*updating the quota parameter based, at least partially, upon the first licensing amount (Figure 61 (2239) update Meter, [0393]);*

*sending license terms/parameters/rules from the management system over a network to a licensing host that communicates with the first set of software and enforces the license terms relative to the first set of software (Figure 77, [0083] [0093] [0162-01634); and*

*allowing the first set of software to be used under the contract ([0062] Figure 3 (402) GO).*

Referring to Claims 56-64 and 127-135:

Ginter discloses a computer implemented method and medium for managing a contract ([0012] under VDE, *such an extended agreements may comprise an electronic contracts [0053]), comprising:*

*receiving, over a network, from a client/user computer that runs a browser program ([0989][1892] [2238] user may either make use of a standard application program (e.g. World Wide Web browser; browsing interface [2196]) at a management system, an inquiry regarding licensing of a first set of software under a particular contract [0007-0008] Electronic content [0012] electronic contract, [0053] VDE can enable a very broad variety of electronically enforced commercial and societal*

Art Unit: 3629

*agreements. These agreements can include electronically implemented contracts, licenses, laws, regulations, and tax collection; [0078-0081] Electronic content [0093], [0161-0162], Figures 72A-72D, [0137] content providers who employ the present invention may include software applications [0425] the "events" may include, for example, a **request to use content or generate a usage permission**; a common example of this type of negotiation today is the purchase of software under the terms of a "shrink-wrap license"; [1947] an electronic contract is an electronic form of an agreement including rights, restrictions, and obligations of the parties to the agreement. In many cases, electronic agreements may surround the use of digitally provided content; for example, a license to view a digitally distributed movie);*

*in response, accessing information from the management system pertaining to the contract, the information comprising quota parameters which specifies a quota of resources that can be consumed under the contract (Figure 2A Rules and controls, Figures 5A and 5B **Permissions record** (808) [0161-0162] parameters [0166] metering the number of copies, Figures 3 and 4, [0214],[0426-0433]);*

*accessing one or more other sets of information at the management system pertaining to one or more other contracts related to the contract ([0012] and [0161-0162]), each of the other sets of information comprising one or more contract terms associated with one of the contracts (Figures 3-4, [0061] [0077-0081];*

*processing the information in a particular order and searching as each set of information is processed to derive one or more applicable contract terms that apply to the inquiry by reconciling the information to extract one or more applicable contract*

Art Unit: 3629

terms and upon finding a contract term that applies, including the term as one or more applicable contract terms [0061- 0067] *a rights application under VDE is made up of special purpose pieces, each of which can correspond to one or more basic electronic processes needed for a rights protection environment. These **processes can be combined together like building blocks** to create electronic agreements that protect these rights, [0254] seniority of contributed control information [1209-1213] PERCs 808 are organized as a hierarchical structure, [0249-0255]).*

determining a first licensing amount attributable to licensing the first set of software, said licensing amount determined, at least partially, by applying one or more of the contract terms ([0012], [0405] *how much it costs to use the content, [0410-0411 specify how much it costs, [0426-0431]; Figures 3 and 4 Figure 26A (944) number of rights record; Figure 50d (1718))*);

updating the quota parameter based, at least partially, upon the first licensing amount (*Figure 61 (2239) update Meter, [0393]*);

sending license terms/rules/parameters over a network to a licensing host that communicates with the first set of software and enforces the license terms relative to the first set of software (Figure 77, [0083] [0093] [0162-01634]; and

allowing the first set of software to be used under the contract ([0062] *Figure 3 (402) GO*).

Referring to Claims 2, 5-10, 24, 29-37, 73, 76-81, 95, and 100-108:

Ginter discloses a method and medium further comprising:

Art Unit: 3629

receiving a second inquiry regarding licensing a second set of software, or obtaining a service comprising technical support, or purchasing a product under the contract or a set of property comprising intellectual property or proprietary information ([0017] electronic information products [0025] electronic products [0046-0052] [0071] [0093] [0161-0162] [0174]);

determining a second licensing amount, service amount, purchasing amount attributable to licensing the second set of software, obtaining the services, purchasing the product, or licensing the property, by applying one or more contract terms ([0012], [0405] *how much it costs to use the content*, [0410-0411 *specify how much it costs*, [0426-0431]; *Figure 26A (944) number of rights record*; *Figure 50d (1718)*);

updating the quota parameter based, at least partially, upon the second licensing amount, service amount, purchasing amount (*Figure 61 (2239) update Meter*, [0393]); and

allowing the second set of software to be used under the contract, the service to be rendered, the product to be purchased, or the property used ([0062] *Figure 3 (402) GO*).

Referring to Claims 3, 25, 74, and 96:

Ginter discloses wherein the first set of software and the second set of software are different sets of software ([0012], [0061][0107] [0161], also see [2320]).

Referring to Claim 4, 26, 75, and 97:

Ginter discloses upgrades in paragraph [0649].

Art Unit: 3629

Moreover, the fact that the second set of software is an upgraded version of the first set of software is determined to be non-functional descriptive data since the method would be performed the same no matter whether the software was an upgrade or not. The type of software is not functionally interrelated with the steps of the invention and thus this descriptive material will not distinguish the claimed invention from the prior art in terms of patentability. See *In re Gulack*, 217 USPQ 401 (CAFC 1983), *In re Lowry*, 32 USPQ2d 1031 (CAFC 1994).

Referring to Claims 11, 41, 82, and 112:

Ginter discloses wherein updating the quota parameter comprises reducing the parameter by the first licensing amount (*Figures 3 and 4 Figure 61 (2239) update Meter, [0393], [0161]*).

Referring to Claims 27-28 and 98-99:

Ginter discloses wherein the one or more contract terms applied to determine the first licensing amount are the same as/different from the one or more contract terms applied to determine the second licensing amount (*[0061- 0067] a rights application under VDE is made up of special purpose pieces, each of which can correspond to one or more basic electronic processes needed for a rights protection environment. These processes can be combined together like building blocks to create electronic agreements that protect these rights, [0254] seniority of contributed control information [1209-1213] [0161-0163] agreement may also result from an automated electronic process during which terms and conditions are "evaluated" by certain VDE participant control information that accesses whether certain other electronic terms and conditions*

Art Unit: 3629

*attached to content and/or submitted by another party are acceptable; such an evaluation process may be quite simple, for example a comparison to ensure compatibility [0161] VDEF capabilities "evolve" to reflect the requirements of one or more successive parties; [0163] VDE participants directly, through a user interface means, resolve "disagreements" between control information [0164] another party (other than the first applier of rules), perhaps through a negotiation process, accepts, and or adds to and/or modifies, "in place" content control information, a VDE agreement between two or more parties related to the use of such electronic content by be created [0249] the control information can determine for example how and/or to whom electronic content can be provided).*

Referring to Claims 12-16, 42-46, 48, 83-87, 113-117, and 119:

Ginter discloses wherein the first inquiry specifies one or more additional inquiry parameters and wherein the amount is determined based, at least partially, upon at least one of the additional inquiry parameters (*[0214] flexible metering, enables such flexibility of metering control mechanisms to accommodate different parameters [0055] [0108] allows electronic commerce participants to freely stipulate their business requirements and trade-offs*) wherein the parameter is specified by the sender of the inquiry and wherein the one or more parameters comprises indicating a desired amount of time or duration of the license, how may users may concurrently use the software, how may copies of the software are desired (*[0111] VDE can further be used to enable commercially provided electronic content to be made available to users in user defined portions*).

Art Unit: 3629

Referring to Claims 17, 49, 88, and 120:

Ginter discloses granting a license to use the item for a period of time (Figure 26A Expiration date/time for this record (932) [0189], [0190], [0196-0197], [216]).

Referring to Claims 19, 51, 90, and 122:

Ginter discloses disallowing use of the item under the contract (*Figure 3 (402) NO GO*).

Referring to Claims 22, 55, 93 and 126:

Ginter discloses receiving a request to deploy the software and deploying the software to a host specified by a sender ([0032-0035], [0061-0062]).

Referring to Claims 38-40, and 109-111:

Ginter discloses wherein the one or more contract terms comprise an uplift, a discount or a multiplier ([0174] discounted by 15% [0186-0190] pricing discounts).

Referring to Claims 47 and 118:

Ginter discloses wherein the first inquiry specifies a set of inquiry parameters, which include a reference to the first set of software and one or more additional inquiry parameters, and wherein determining the licensing amount comprises determining, based at least partially upon one or more of the inquiry parameters which of said one or more contract terms to apply to the first inquiry ([0061- 0067] *a rights application under VDE is made up of special purpose pieces, each of which can correspond to one or more basic electronic processes needed for a rights protection environment. These processes can be combined together like building blocks to create electronic agreements that protect these rights, [0254] seniority of contributed control information.*

Art Unit: 3629

*[1209-1213] [0161-0163] agreement may also result from an automated electronic process during which terms and conditions are "evaluated" by certain VDE participant control information that accesses whether certain other electronic terms and conditions attached to content and/or submitted by another party are acceptable; such an evaluation process may be quite simple, for example a comparison to ensure compatibility [0161] VDEF capabilities "evolve" to reflect the requirements of one or more successive parties; [0163] VDE participants directly, through a user interface means, resolve "disagreements" between control information [0164] another party (other than the first applier of rules), perhaps through a negotiation process; accepts, and or adds to and/or modifies, "in place" content control information, a VDE agreement between two or more parties related to the use of such electronic content by be created [0249] the control information can determine for example how and/or to whom electronic content can be provided)*

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18, 20-21, 50, 52-54, 65-71, 89, 91-92, 121, 123-125 and 136-142 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginter.

Art Unit: 3629

Referring to Claims 18, 20-21, 50, 52-54, 65-71, 89, 91-92, 121, 123-125 and 136-142:

Ginter discloses a computer-implemented method and medium for managing a contract ([0012] electronic contract), comprising:

receiving, over a network, from a client computer that runs a browser program ([0989][1892] [2238] user may either make use of a standard application program (e.g. World Wide Web browser browsing interface [2196]), at a management system, a communication [2196];

accessing information pertaining to the license, the information comprising a reference to a contract with one or more contract terms under which the license was granted, the contract having quota parameters associated therewith which specify a quota of resources that can be consumed under the contract; the information to the license further comprising a licensing amount attributable to the licensing of the software ([0007-0008] *Electronic content [0012] electronic contract, [0053] VDE can enable a very broad variety of electronically enforced commercial and societal agreements. These agreements can include electronically implemented contracts, licenses, laws, regulations, and tax collection; [0078-0081] Electronic content [0093], [0161-0162], Figures 72A-72D, [0137] content providers who employ the present invention may include software applications [0425] the "events" may include, for example, a **request to use content or generate a usage permission**; a common example of this type of negotiation today is the purchase of software under the terms of a "shrink-wrap license"; [1947] an electronic contract is an electronic form of an*

Art Unit: 3629

*agreement including rights, restrictions, and obligations of the parties to the agreement.*

*In many cases, electronic agreements may surround the use of digitally provided content;*

*for example, a license to view a digitally distributed movie).*

determining a first licensing (subsets or extended agreements) amount attributable to licensing the first set of software ([0012][0405] *how much it costs to use the content*; [0410-0411] *specify how much it costs*[0426-0431], Figure 26A (944) *number of rights record*, Figure 50d (1718));

sending license terms/parameters/rules over a network to a licensing host that communicates with the first set of software and enforces the license terms relative to the first set of software (Figure 77, [0083] [0093] [0162-01634]); and

Ginter discloses usage auditing, reporting, and payment [0078]. Ginter does not disclose receiving a request to terminate a license, determining a refund amount and updating the quota parameter based upon the refund.

However, customer service is a key factor in the success of any business. One way to keep customers satisfied to provide refunds for unused portions or providing credits for the unused portion. This practice of giving a customer a refund for unused portions is an old and well established business practice, for example, when a customer is dissatisfied with the product and wants to return the product. The practice is designed to keep customers returning for services as shown in the following references submitted as evidence of examples of a refund after termination of a license for software in the Office action dated August 11, 2006.

1. EarthWeb provided ITKnowledge electronic book (ebook) services.

Art Unit: 3629

EarthWeb discloses that they will **fully reimburse** licensees for **unused portions** of the license.

2. US 2003/0040917 discloses that the browser application will allow listeners to listen to netcasts. In addition to single payments at the time of downloading, subscription arrangements may allow a predetermined number of downloads within a predetermined period of time (**with or without the possibility of refunds or rebates for unused opportunities** [paragraph [0122]]).

3. US 2003/0126033 discloses once software is returned, a value is put on the returned along with full refunds, partial refunds, or no refund [0193] [0282].

Even as far back as 1971, a subscription communication system discloses in patent number 3,751,670 (Grodner et al) discloses an economically sound basis for the broadcaster to discontinue charging fro the remainder of the program.

Therefore, it would have been obvious to one of ordinary skill in the art to incorporate into the contract management method and medium disclosed in Ginter a refund mechanism since it makes good business sense to provide a credit for unused portions so as to maintain customer satisfaction and loyalty, thus generating return business.

#### ***Response to Arguments***

4. Applicant's arguments filed November 13, 2006 have been fully considered but they are not persuasive.

Art Unit: 3629

The applicant states that claim 1 requires that the license parameters be sent over a network from the management system to a licensing host that is coupled to the management system via the network. Applicant states that the cited portions of Ginter indicate that the "VDE content container" contains both content and certain control information related to the use of that content. Applicant then asserts that the Office action apparently analogizes this "control information" to the "license parameters" of claim 1 and that the cited portions of Ginter do not disclose that any "management system," which performs various operations as recited in claim 1 sends such "control information" over a network to any "licensing host" that is coupled to the management system via that network.

First, as for applicant's comments about the *cited portions* of Ginter, the Examiner cites particular columns and line numbers in the references as applied to the claims for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested that, in preparing responses, the applicant fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Secondly, the applicant identifies the client system as:

[0027] The client 106 is the entity that is used by a customer to interact with the management system 102. Using the client 106, the customer may interact with the management system 102; for example, to browse a list of software available for licensing, submit an inquiry for a quote on a particular set of software, submit a request to carry out a transaction under a contract, and

Art Unit: 3629

manage and deploy licenses that have been obtained. For purposes of the present invention, **the client 106 may be any entity capable of communicating with the management system 102 via network 104.** In one embodiment, the management system 102 is implemented in an Internet environment. In such an implementation, **the client 106 may be a computer running a standard browser program 150.**

As for the language describing the licensing host, the Examiner finds the following disclosure in the specification:

[0026] As shown, system 100 comprises a management system 102, a network 104, and a plurality of entities that invoke the functionality of the management system 102, **including a client 106, a licensing host 108, and a software host 110.** For the sake of simplicity, only one of each of these entities 106, 108, 110 is shown in FIG. 1, but it should be noted that the management system 102 is capable of interacting with any number of invoking entities. From a functional point of view, **each of the entities 106, 108, 110 is a separate component; however, from a physical standpoint, the entities 106, 108, 110 maybe embodied on any combination of machines. That is, all of the entities 106, 108, 110 may be embodied in the same machine, each entity may be embodied on a different machine, or some combination thereof.**

[0028] Whereas the client 106 is used by a customer to select and license a set of software, the **licensing host 108 and the software host 110** are used by a user to actually run the software (**note: the user and the customer may be the same person or they may be different people**). In one embodiment, the licensing host 108 runs a set of license management software 152. **As will be explained further in a later section, the license management software 152 ensures that the terms of a license, once it is obtained from the management system 102, are enforced.** For example, the license management software 152 makes sure that the number of users using a set of licensed software does not exceed the number specified in a license.

Applicant's primary argument appears to be that Ginter does not disclose license parameters being sent over a network from the management system to a licensing host that is coupled to the management system via the network. The Examiner respectfully disagrees with applicant's assertion.

Ginter discloses a network (Figure 1). Figure 2 discloses a content creator who creates "content" and "rules and controls" (parameters) for distributing the content [0404]. These "rules and controls" are sent to the VDE rights distributor (distributor) over an electronic highway [0405]. The distributor generates her own "rules and controls" that relate to usage of the content, for example, specifying what a user can and cannot do with content, how much it cost [0405]. The distributor and the content creator may be the same person or they may be different people [0408]. The Examiner interprets this to be the functional equivalence of a licensing host. The financial clearinghouse and the VDE administrator sends "administrative information" to the VDE participants and helps keep the virtual distribution environment operating properly. The VED administration and the financial clearinghouse roles may be performed by different people or companies [0409]. The Examiner considers this to be the functional equivalence of a management system.

Figure 2 shows the VDE Rights Distributor coupled to the Financial Clearinghouse and VDE Administrator via a network.

Applicant states that claim 1 further requires the licensing host to communicate over the network with the set of software whose licensing the inquiry regards. Once again applicant states that the cited portion of Ginter do not disclose any "licensing host" that communicates with such a set of software over a network.

Again, as for applicant's comments about the **cited portions** of Ginter, the Examiner cites particular columns and line numbers in the references as applied to the claims for the convenience of the applicant. Although the specified citations are

Art Unit: 3629

representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested that, in preparing responses, the applicant fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Moreover, the usage-related "rules and controls" from the VDE Rights Distributor (equivalent to a licensing host) distribute rights to use the content by sending the content's "rules and controls" to the content user such as a consumer [0406]. Content can be computer software [0396].

Applicant states that Ginter does not disclose that license parameters are sent over a network from a management system to a licensing host that is coupled to the management system via the network. Ginter discloses licensing parameters in paragraph [0161]. As stated above, Ginter discloses the functional equivalence of the management system coupled to a licensing host via a network.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stefik (US 2006/0004665) Figures 2 and 19: Figure 2 illustrates the basic interactions between repository types [0046].

Wyman (US 5,204,897) discloses a license management server and a license management system.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
